**DETAILED ACTION**

***Election/Restrictions***

Applicant's election of Group I in the reply filed on 05/09/2005 is acknowledged. Because applicant did not specifically point out the supposed errors in the restriction requirement, it has been treated as an election without traverse (MPEP § 818.03(a)).

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. All of claims 1-4 are written using non-idiomatic language. Claims 1-4 do not clearly recite marking or engraving apparatus. The claim language is vague pertaining to the apparatus for marking and pertaining to the article which the apparatus marks. Claim 2, "PLC" is not clearly described. Terms/phrases such as "preferably", "can be done", and "with or without" do not positively limit claims.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by JP358090985A. The English language abstract describes both laser marking apparatus

Art Unit: 1725

and heated plate marking apparatus. Computer control of a marking process in a manufacturing facility is inherent.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art pertains to marking of articles.
